Facilitating dreams for centuries

In trade, everything changes but yet stays the same because for centuries, trade has always been facilitated by strategic ports. From years past to our independence, the Port of Mombasa has been facilitating dreams, supporting entrepreneurship goals and trade for East and Central Africa. Today, Mombasa is rated amongst the top 5 ports in Africa, with a robust team, world class infrastructure and efficient transport networks right up to the hinterland. So, you can be confident that as the region achieves even greater global economic significance, we will be there, moving, transhipping and facilitating trade, for the next 50 years and beyond.

There is no industry or economy that can boast of any level of progress without research, so it is with great pleasure that I welcome all our delegates, exhibitors and visitors to the International Construction Research Conference and Exhibition (ICORCE 2018).

Having seen the conference grow from an idea to the forum that it is today, attracting thousands of delegates and visitors and showcasing the best different nations have to offer is a moment of pride for the Ministry, and we will continue to offer our support to ensure its growth and recognition not just regionally but globally.

The Kenya Government Pavilion, one of the side events featured during the conference is a testament to our country’s commitment to easing both the cost and efficiency of doing business in the construction industry. We are also proud of the partnership with the Big Five Construct East Africa, which further demonstrates the strength of international cooperation.

The Big Four Agenda is our country’s main focus at the moment, and as the Ministry prepares to unveil social and affordable housing for all, we are preparing to leverage on innovative building materials and technologies, some of which we expect to see showcased this week.

The global economy relies on trade in order to grow, and this conference, through its different platforms including the Construction Industry Business Forum, is providing an environment conducive to attracting both internal and external investors.

As we open the 2018 edition of ICORCE, I urge all of us to derive as much benefit as possible from these next few days, and to also contribute as much as possible. If we all make that commitment, then we will have nothing short of an incredible experience.
Research is undoubtedly the cornerstone of any industry’s development, which is why ICORCE remains a critical forum not just for this sector but for the country’s economy as whole. The Big Four Agenda has been echoed in all sectors this year, aimed at achieving food security, affordable housing, manufacturing and affordable healthcare for all. The realization of all of the above can only be bolstered by embracing technology and innovation.

Research affords efficiency and cost effectiveness, the easiest route to fast tracked development. As a State Department, we recognize the need for this forum, because it is necessary to ignite conversations in order to foster growth. We may not always appreciate the role of research, but it underpins progress, especially in the construction industry. If it wasn’t for the physicists and engineers times past, we would be unable to erect sky scrapers over 150 stories high, or ensure the resilience of structures to natural disasters such as earthquakes, or even build over water.

Now, we can construct an entire building in a matter of weeks, or even 3D print a fully functional stainless steel bridge. The possibilities are virtually limitless.

I remain positive that this conference will have progressive ideas that will yield tangible results, yet another step towards ensuring the continuous development of the industry and the country at large.

Prof. Paul M. Maringa
Principal Secretary
State Department of Public Works
A warm welcome to the 2018 ICORCE Conference delegates. This year’s event, just like previous years, derives its theme from the industry’s National Construction Research Agenda (NaCRA), this time exploring how harnessing the potential of the legal and institutional framework positively contributes to inclusive and sustainable growth in the construction industry.

The industry is currently overhauling various policies that directly affect construction in the country, including the Building Code. The Authority has been tasked with spearheading the main Construction Industry Policy, an overarching reference point that will inform, guide and serve as a blueprint for the achievement of the sector’s objectives and realization of Vision 2030.

The process has been a consultative and collaborative effort with various industry stakeholders in order to offer comprehensive and exhaustive solutions to the industry’s multi-faceted, multi-dimensional problems. The agenda for the policy was set after the 2016 conference, and its formulation was instigated by the different challenges facing the industry such as construction works with compromised quality and safety, inadequate funding for expansion, lack of access to plant equipment and machinery, insufficient dissemination of skills to build capacity among the sectors players, procurement bottlenecks, fierce competition from international service providers and corruption, among others. The policy aims to address thematic areas that will include; business development, quality assurance, materials and technology, sustainability, capacity building, research, ethics and the legal framework.

This year’s edition provides yet another platform to discuss the above, and we look forward to solutions that will create an enabling construction environment, encourage public-private involvement in infrastructure development and provide clear guidelines towards rehabilitation of existing infrastructure, further streamlining the regulatory and administrative regimes to minimize document processing time. It is our sincere hope you enjoy the process.
On behalf of the National Construction Authority, I am delighted to welcome all delegates to this year’s conference.

This is the third edition, but the first in the new biennial format, now stylized as the International Construction Research Conference and Exhibition. Another first for this year is the addition of two new and exciting side events, the Construction Industry Business Forum (CIBF) and the Kenya Government Pavilion.

CIBF is a business networking forum bringing together key stakeholders in the country, allowing them to expose their brands, brainstorm on challenges and possible solutions as well as generate constructive business leads, both locally and internationally.

Our delegates and guests will also have the benefit of visiting the Kenya Government Pavilion, a mini exhibition featuring key state agencies involved in the construction industry value chain. This will assist potential and existing investors navigate their way through the industry’s statutory requirements. We are proud to host the Kenya Revenue Authority, the Department of Immigration, the Kenya Investment Authority, Kenya Bureau of Standards and other key agencies at the Pavilion, and we are sure they will be of great assistance to our delegates.

The conference in 2016 attracted over a thousand delegates and over 8500 visitors to the exhibition held in conjunction with our partner, the Big 5 Construct East Africa. We look forward to a productive event, filled with learning and knowledge sharing towards bridging the gaps within construction research in the region.

This event would not have been possible if not for the tireless efforts of the ICoRCE Planning Committee, made up of various stakeholders across the industry. The Authority extends its warm appreciation.

Executive Director / Registrar of Contractors
National Construction Authority
Bonds, Guarantees and Standby Letters of Credit

CBA Trade Finance issues guarantees as follows:

- Bid Bonds
- Performance Bonds
- Advance payment Guarantees
- Warranty/Retention Guarantees
- Payment Guarantees
- Customs Bonds
- Immigration Bonds
- Shipping Guarantees
- Standby LCs

Benefits:

- Financial credibility and creditworthiness which is backed by CBA
- Easier to obtain advance payment for delivery of goods
- Protection against commercial risks of non-compliance or limited compliance with the contract by the partner
- Guarantees immediate payment in the event of default to guarantee conditions by the applicant

Requirements:

- Duly completed and signed Guarantee application form
- Guarantee facility or Cash margin

42 years after the 1969 Engineers Registration Act took effect, establishing the Engineers Registration Board, the Engineers Act of 2011 was enacted, effectively putting in place the Engineers Registration Board.

The new Act was necessitated by the desire to create capacity in the engineering profession, critical to the implementation of Kenya’s Vision 2030. This was part of the wider reforms in the infrastructure sector, focusing on strengthening the human resource element.

Eng. Nicholas Musini, the Registrar and Chief Executive Officer (CEO) of the Engineers Board of Kenya (EBK) states, “The enactment of the Engineers Act has provided a wider legal mandate and as well as an opportunity to create an institution that is dedicated to the growth and regulation of the engineering profession in line with global best practices.”

EBK Chairman D.M Wanjau echoes the same, saying, “We are proud to be working closely with other government agencies to meet the objectives of Vision 2030’s economic blueprint in order to facilitate development, as engineers play a critical role in the core pillars.”

7 years on, the Board has managed to register 12,000 engineers.

Global nature of the practice
Globally, the engineering profession is recognized to be regulated in two phases: engineering educational standards and professional competence. EBK has been realigning the practice in the country to meet international standards as it seeks to provide a platform for the global mobility of engineering professionals.

Since its formation, EBK has been working towards the establishment of robust accreditation systems as well as providing professional examinations for the advancement of engineers in line with best global practices.

Eng. Musuni is proud of the fact that the Board has overseen the number of institutions accredited to offer engineering programs increase from four (4) in 2014 to ten (10) currently. Two more (Technical University of Kenya and Jomo Kenyatta University of Agriculture and Technology) also have programs at advanced stages of accreditation. Some private universities, such as Strathmore, have also shown the intention of offering engineering programs.

“The Board has also overseen the increased registration rates of engineers from an average of sixty about five years ago to 180 during
the year 2017/2018. The number of professional and consulting engineers now stands at 2200 up from 1700 in 2014, representing close to a 30% increase in just four years, "he adds.

The increased numbers are encouraging, so much so that the Government is now having discussions towards granting the Board seed money to implement the Graduate Engineers Internship Program (GEIP) in the current year.

EBK Chairman Eng. Wanjau continues: "As practitioners and regulators, we must brainstorm on possible enabling laws that can promote the growth of the engineering profession within this relatively new area of application in our continent."

The 2018 Supreme Court Ruling
The Supreme Court ruling delivered on 17th July 2018 was a setback to the Board, specifically on the matter of registration of graduate engineers.

The judgement was a culmination of a long drawn court dispute between the then Engineers Registration Board and past students of Masinde Muliro University of Science and Technology and Egerton University. The students sued the Board for refusing to recognize their degrees as adequate for practice.

The High Court determined that the ERB under the repealed Act did not have powers to accredit programs and that it should have recognized the degrees and registered the students. However, the Board was dissatisfied and appealed to the Court of Appeal.

The Court of Appeal in a three judge bench arrived at a unanimous decision and determined that the ERB acted within its mandate and that the Universities were at fault for not addressing the concerns raised by the Board on the quality of the programs. The students moved to the Supreme Court which, in a majority decision, set aside the Court of Appeal ruling and reinstated the High Court decision. The Board has been compelled to register all the petitioners as directed by the Supreme Court.

According to the Board, the issues of the quality of the graduates to be registered has not been resolved, given that there were no remedial measures prescribed by the Supreme Court to attend to the concerns of the training of the graduates. Neither is there clarity on whether those programs are now recognized, given that some of the programmes are no longer being offered by the institutions.

In a public notice published in August 2018, the Board further called on all persons holding an engineering degree dating to the ERB days to submit their applications. It is reviewing the applications with a view of admitting those affected as graduate engineers.

Eng. Musuni confidently states, "The Board has assured the public that under the new legal framework, it is empowered to legally accredit programs for the purpose of practice and is working with the Council for University Education for seamless accreditation of programs."
Continental Titles Won .

2014 - 2017

Held position in the Kenya National Volleyball League for the period.

YOUR AMBITION
GOT YOU HERE

Nothing comes easy and I bet you know that. Coming in at 3rd place in the 2018 Volleyball African Club Championship is a commendable achievement. It has all been a build up through the years. With all the different successes, our galant girls are now one of the top three teams in Africa. Congratulations KPC ladies volleyball team. Thank you for making us and your country proud.

SESSION THREE: LEGAL AND SOCIAL RE-ENGINEERING

**Rapporteurs:** Jack Gitonga Ireri, Isaac Waithaka  
**Session Moderator:** LSK, IEK  
**Session Coordinator:** Cindy Ogola, Sam Mulondo

14:00 - 14:15  Improved Legal Measures in Curbing Corruption in The Construction Industry: Halakhe Waqo, EACC  
14:15 - 14:30  Opportunities for Systemic Development of the Legal Framework Construction Industry: Joash Dache, MBS, KLRC  
14:30 - 14:45  The Gender Question in the Construction Industry in Kenya: Mr. Daniel Waitere, NGEC  
14:45 - 15:00  Empowering of the Residence Associations as Part of the Ingredients for the Development of the Construction Industry: Mr. Henry Ochieng, KARA  
15:00 - 15:15  Corruption and Associated Risks in Development of the Construction Industry: Mr. Samuel Kimeu, TI  
15:15 - 16:00  PANEL DISCUSSIONS  
Panelists: Halakhe Waqo, Joash Dache, Henry Ochieng and Daniel Waitere  
16:00 -16:15  Closing Remarks

SESSION FOUR: THE BIG 4 AGENDA AND CONSTRUCTION MANAGEMENT

**Rapporteurs:** Lawson Oriago, Joshua Gatheru  
**Session Moderator:** IEK, KIP  
**Session Coordinator:** Bryson Obwanda, Morsely Otieno

8:15 - 8:30  Welcoming and Opening remarks  
8:30 - 8:45  How the Government Can Leverage The Fourth Industrial Revolution In Managing Construction Projects: Kelvin Wachira  
8:45 - 9:00  The Potential of BIM models as Legal Construction Documents for Inclusive and Sustainable Growth in The Kenyan Construction Industry: Thomas Kimani  

**PANELIST HIGHLIGHTS**  
9:00 - 9:15  The Opportunities in Synergy in National and County Governments in Implementing Big 4 Agenda: Qs. Alphonce Okweto  
9:15 - 9:30  The Role of Infrastructure Assets in Driving Development Policy: Case of the Big 4: Eng. Francis Gitau  
9:30 - 9:45  Opportunities for Economic Transformation Resulting from Enhanced Development Control Systems [Managing Tradeoffs and Benefits Accruing From Digitization]: CoG Representative  
9:45 - 9:10  How Quality of Plastics Can Aid Affordable Housing, Dominic John George  
10:00 - 10:30  PANEL DISCUSSION  
10:30 – 10:35  Panelists Dr. Mugwima, Qs. Okweto, Eng. Francis Gitau
SESSION FIVE: ENVIRONMENTAL SUSTAINABILITY AND SAFE CONSTRUCTION SITES

Rapporteurs: Grekk Ojijo, Stephen Kyato Kiilu
Session Moderator: AAK, KIP
Session Coordinator: Faith Mbithi

11:00 – 11:15  Management of Environmental Impacts in Construction: Eamon McShea
11:30 – 11:45  Impact of Regulatory Framework on Building Performance: John Gachinu
11:45 – 12:00  Durability Concepts: Blended Cement for Aggressive Environments - F. Sakwa, Bamburi
12:00 – 12:15  Leveraging on the Existing Laws to Attain Safe Construction Sites in Kenya - Davis Ochillo, DOSH
12:30 – 12:45  PLENARY SESSION (QUESTION AND ANSWER)
12:45 – 12:50  Sponsor’s Presentation: BAMBURI CEMENT

SESSION SIX: CONSTRUCTION PROJECT FINANCING

Rapporteurs: Charity Makai, Brian Nyaware
Session Moderator: IQSK, ICPAK
Session Coordinator: Jim Mushira

14:15 – 14:30  Kenya’s Construction Industry Output Response to Commercial Banks’ Lending Rate (1919 - 2015): Emmanuel Thyaka, JKUAT
14:30 - 14:45  Model for the Construction Industry; Innovative and Emerging Financing Models in Construction: Rodgers Odimba
14:45 – 14:00  The Effectiveness of Using Public Private Partnerships to Ensure Housing Delivery in Nairobi Metropolitan Region: Daniel Mutegi

PANELIST HIGHLIGHTS

14:00 - 15:15  Impact of Recent Tax Changes and Regulations for the Construction Industry in Kenya - Nebart Avutswa
15:15 - 15:30  Public Private Partnerships Financing Models to Boost SME Financing: Dr. Eric Aligula, Economic Advisor
15:30 - 15:45  How can Capital Projects Mitigate Risk and Promote Inclusive and Sustainable Growth: Caroline Ray, Arup East Africa Limited

PANEL DISCUSSION ON Project financing for MSME contractors in Kenya construction industry
Panelists: Nebart Avutswa, Dr. Aligula Eric, Caroline Ray

16:00 -16:15  Reading of Conference Resolutions: Rapporteurs- KIPPRA, UON, JKUAT, MOLHUD
18:00 -21:00  GALA DINNER, COMESA GROUNDS KICC
CONSTRUCTION INDUSTRY BUSINESS FORUM

Forum theme: Affordable Housing and the Role of the Manufacturing Industry in Accelerating Growth of the Construction Sector

7th November 2018  Session Moderator- Wangui Kabala

6.30 pm - 9:30 pm
Networking Business Cocktail at Sankara Hotel, Nairobi

8.30am – 8.45 am
Welcome Remarks 
Eng. Maurice Akech(ED. NCA)

8:45 am - 09:00 am
Opening Remarks By the Guest of honor: 
Charlie Hinga (PS, Housing)

9.00 am -09.15 am
Doing Business in Kenya: 
Dr. Moses Ikiara (Chief Executive Director, KIA)

9.15am - 9.30am
Exploring Alternative Financing Solutions for Projects in Africa: JeanPierre Labuschagne, Partner & Lead for Infrastructure & Capital Projects

9.30am - 9.35 am
Sponsors Remarks:KCB

9.35am - 9.50 am
Construction Laws and Attendant Regulations in the Industry
Samson Lukoba (Corporation Secretary, NCA)

9.50am – 10.10am
Successes and Challenges in Actualizing the Affordable Housing Agenda- A South African Study: Joseph Leshabane

10.30am – 10.55am
Panel Discussion - Session Moderator- AAK
- Ivan Korsak, Embassy of Belgium-Kenya
- Maxwell Okello, CEO American Chamber of Commerce-Kenya
- Moses Ikiara, CEO, Kenya Investment Authority
- JeanPierre Labuschagne, Deloitte
- Patrick Bucha, Secretary, HUD
- Joseph Leshabane, Human Settlements-South Africa

10.55am-11.0am
Health Break

11.10 am – 11.25am
Session Moderator- KIP
Opportunities for Local and Foreign Investors in the Big 4 Agenda and the Role of KAM in Facilitating Participation
Tobias Alando, Kenya Association of Manufacturers

11.25am-11.45am
Trends and Developments in Alternative Building Technologies- A Global Study, Joe Odhiambo, CEO, Agrément South Africa
SESSION ONE: CONSTRUCTION INDUSTRY BUSINESS FORUM (CIBF)

**Forum theme:** Affordable Housing and the Role of the Manufacturing Industry in Accelerating Growth of the Construction Sector

11.45am - 12.00pm  | **Tax Incentives and Exemption Regime in Kenya - A focus on the Manufacturing and Construction Industries**, KRA

12.00pm - 12.15pm  | **Sponsors Remarks:** Liberty/Heritage Insurance

12.15pm - 12.30pm  | **Facilitation of Investments by the County Governments:** Council of Governors Technical Committee Trade, Industry & Investments, Ali Korani (Chairperson)

12.30pm - 1.00pm   | **PPPs - A Solution for Infrastructure Development in Africa - An African Study:** AECOM, Joao Ramos

1.00pm - 1.40pm    | **Topic 1:** Fostering Development of MSMEs in Kenya  
**Topic 2:** Utilization of Business to Business Partnerships/ Public Private Partnerships in Realization of Public Projects

**Panel Discussion - Session Moderator - AAK**
- SME Authority, John Mwangi
- Ronald Osumba, Chairman, Youth Fund
- Tobias Alando, KAM, Chief Executive Officer
- Maurice Owiti, Deputy, KFMB
- Roy Mnisi, ED, Master Builders South Africa
- Joao Ramos, Business Development, East Africa, AECOM
- Dr Ronoh Tuimising, Legal Expert PPP Unit, National Treasury

1.40pm - 1.50pm     | **First Session: Closing Remarks**

1.50pm - 2.30pm     | **Health Break/Lunch**

SESSION TWO

2.30pm - 4.30pm     | **Pre-scheduled Business to Business Meetings**

4.30pm - 4.45pm     | **Closing Remarks**
